

Project Development Phase

Model Performance Test

Date	04 October 2026
Team ID	6ab7f10630f9767f87728ca3
Project Name	Import Data Using Transform Maps (Spreadsheet)
Team Leader	E Dilli Kumar
Team Members	R Vinish, K Jerina, B Mohanavalli, P Sri Ragavan
Maximum Marks	10 Marks

Model Performance Testing

The project team has filled the following information in the model performance testing template.

S.No	Parameter	Values	Screenshot
1	Model Summary	• Salesforce automation setup for data management using Objects, Fields and Reports. • Spreadsheet (.csv/.xlsx) records are imported into a custom object using the Data Import Wizard, where the spreadsheet columns are mapped to Salesforce fields (the transform map). • Reports and a dashboard are built on the imported records. • Note: Records are created only if the data matches correctly; otherwise an error is shown.	<i>Screenshot: Object, Fields and Import Wizard mapping</i>
2	Accuracy	• Training Accuracy - 98% • Validation Accuracy - 98% • (Test import of 100 records: 98 created successfully, 2 rejected due to data-type/required-field mismatch.)	<i>Screenshot: Import results and error file</i>
3	Confidence Score (Only Yolo Projects)	• Class Detected - Object and field names are matched correctly; wrong object/field names or mismatched data produce an error. • Confidence Score - 92%: the import mapping is 92% sure the objects and fields are matched correctly. • (Not a YOLO project; the score is reported as mapping confidence.)	<i>Screenshot: Field mapping / auto-map result</i>

Note: sample figures; replace with your actual results and add your screenshots.
